

ABSTRACT OF THE DISCLOSURE

A glove retained by retaining means ~~is~~ enabled to be
donned onto a hand by: providing gloves GR in which a cuff
edge 8_D of a glove palm side part is formed to be offset
5 closer to the glove fingers compared with a cuff edge 8_U
of a glove back side part; hanging the gloves GR by
engaging an upper portion of the glove back side part
located in the vicinity of the upper cuff edge 8_U and
above the lower cuff edge 8_D, with the glove cuff being
10 directed upward and the palm side part with a lower cuff
edge 8_D being placed in front; opening the cuff of the
foremost one of the gloves to an extent sufficient to
enable the hand to be inserted therethrough; and applying
a force to the glove to disengage the glove after
15 inserting the hand through the opened cuff from above.
